## Xena Testimonial

If you're looking for a POS system that is easy to use with outstanding support, then Xena is for you.

We've been dealing with the team at Xena for over a decade and we can say from experience that they move with the times, stay up-to-date with trends and continue to be responsive to our changing business needs. Our business has changed and grown over the years and Xena has more than kept the pace.

With multiple locations, we need a system that is responsive, intuitive and that didn't require a huge amount of time invested in training. With our multiple retail locations, our staff find Xena easy and simple to use. For our Head Office, we can see all the data live from the different locations and have great transparency.

Xena has also is happy to make small adjustments in the system to allow for our particular business systems and processes.

This was critical to us.

We are happy to continue to support Kiwi ingenuity.
